

PROFILE

Collaborative solution seeker, excited for my next roll where I can apply analytical thinking and creative design skills to develop products and systems that inspire innovation and create value.

SKILLS

Front-end Technologies: HTML5, CSS, JavaScript, Angular, Typescript, React, Jest

Development Languages: Java, JavaScript, C#, .Net, Python, FastAPI

Version Control: Git, GitLab, GitHub

Database: PostgreSQL, MySQL

Project Mgmt: Agile, Scrum, Design Thinking

UI/UX: Adobe XD, Figma, Design Principles

Core Skills: Clear, concise communication (written and verbal), rapid learning of complex systems, and effective prioritization in dynamic environments. Skilled in translating complex ideas into actionable insights, designing and delivering training, and managing multiple workflows with precision. Known for maintaining composure under pressure while driving efficient, high-quality outcomes in fast-paced, technology-driven settings.

EDUCATION

Masters of Innovation Design 2020, Wichita, KS

Applied learning that advances critical thinking, creativity, and strategic problem-solving to complex, real-world challenges in rapidly evolving environments. Leveraged human-centered design, agile methodologies, and emerging digital tools to identify opportunities, develop innovative solutions, and iterate quickly based on feedback. Collaborated on a multidisciplinary team to design and propose a smart airport concept for an FAA-sponsored challenge, translating ambiguous problems into actionable solutions and communicating them effectively to stakeholders. Demonstrated the ability to move from concept to execution while maintaining a strong focus on user needs and practical impact.

EXPERIENCE

11/2023 - 11/2025 AFCO Direct, Lake Forest

Carrier Returns Specialist/Portfolio Manager

- Monitored status of premium finance loans
- Maintained relationships with agents
- Read and responded to various reports
- Processed return premium checks and applied them to the proper policies

05/2021 - 04/2023 Catalyte, Chicago

Junior Business Analyst/Project Manager

- Developed ongoing relationships with stakeholders and business executives
- Documented and analyzed business processes for improvement
- Maintained documentation
- Developed and updated doc templates
- Conducted research as needed

Software Developer (2021-2022)

- Followed UI/UX best practices to build intuitive ReactJS single page application for managing hotel reservations.
- Worked with team to build sporting goods e-commerce application using Agile Scrum methodologies, React, Jest, and Cypress E2E testing.
- Built React front-end and Spring Boot back-end for N-tier architecture application designed to help health clinic employees track patients and appointments.
- Led presentation on Design Thinking and restructured section material for Chicago junior and senior high school professional development as part of a 6 week program.
- Training: Assisted client-specific training for product analysts on business analysis and UI/UX design, including Design Thinking. Also served as a Technical/Team Lead in the Project Based Learning/Client Readiness section of the training cycle.
